scantaxi scan coins

1 Introduction

scantaxi.de develops SCENE PlugIn APPs to make the work with SCENE easier and/or faster. Some APPs will be offered with different licensing models.

Available licensing models are:

- Full license - pay once, use the same major version lifetime
- Project license - pay for every use of the APPs
- Project based demo license - for some APPs there is a demo license available

The project license gives the possibility to test the APPs under real conditions or on small projects. The amount of coins needed depends on the amount of scans in a project and the time saving effect. The coins are offered in different package sizes in the FARO 3D App Center.

Please bear in mind to calculate the amount of coins needed for the desired scantaxi APP before buying *scantaxi scan coins* !

2 Usage

After buying *scantaxi scan coins* a transaction code (TAN number) is delivered immediately with the invoice of FARO. These TANs can be used for some scantaxi APPs. scantaxi APPs which support *scantaxi scan coins* calculate the approximate amount of coins needed, whenever a request is started. This process depends on the scantaxi APP - please read the manual for the APP specific details.

For the correct calculation of coins, it is necessary to load old project licenses during the request process. The final calculation is done by scantaxi while generating the license. Usually the license is sent back by e-mail within one business day.

Please keep in mind, that not all scantaxi APPs support *scantaxi scan coins*!

2.1 Activation process

Starting a scantaxi APP without a license shows the license dialog (fig. 1). Within this dialog the following options are available:

- Request and enter full license code (1)
- Create a request file for the current project (2)
- Load the license file for the project received from license@scantaxi.de (3)

2.1.1 Request/load project based license

When a full license is not required, a project based license is recommended. For pricing refer to the corresponding scantaxi APP manual.

Before the request file can be generated, some personal information and valid TAN's (received when ordering *scantaxi scan coins*) need to be entered into the personal information dialog. This dialog gives an approximate estimation of how many coins are probably required.

After generating the request-file an e-mail needs to be sent to license@scantaxi.de. Usually the license is provided within one business day and can be loaded via the license dialog.

Important! The project based license works with the scans stored in the project, before generating the Request-Code! New Scans need a new license and are additionally charged.

For the correct calculation of coins for this project the old license-file has to be loaded, if available (fig. 2a).

The personal information and the TANs are coded in the request-file. All fields need to be filled out (fig. 2b), otherwise the request will not be processed.
